

Disposable Water Bottles

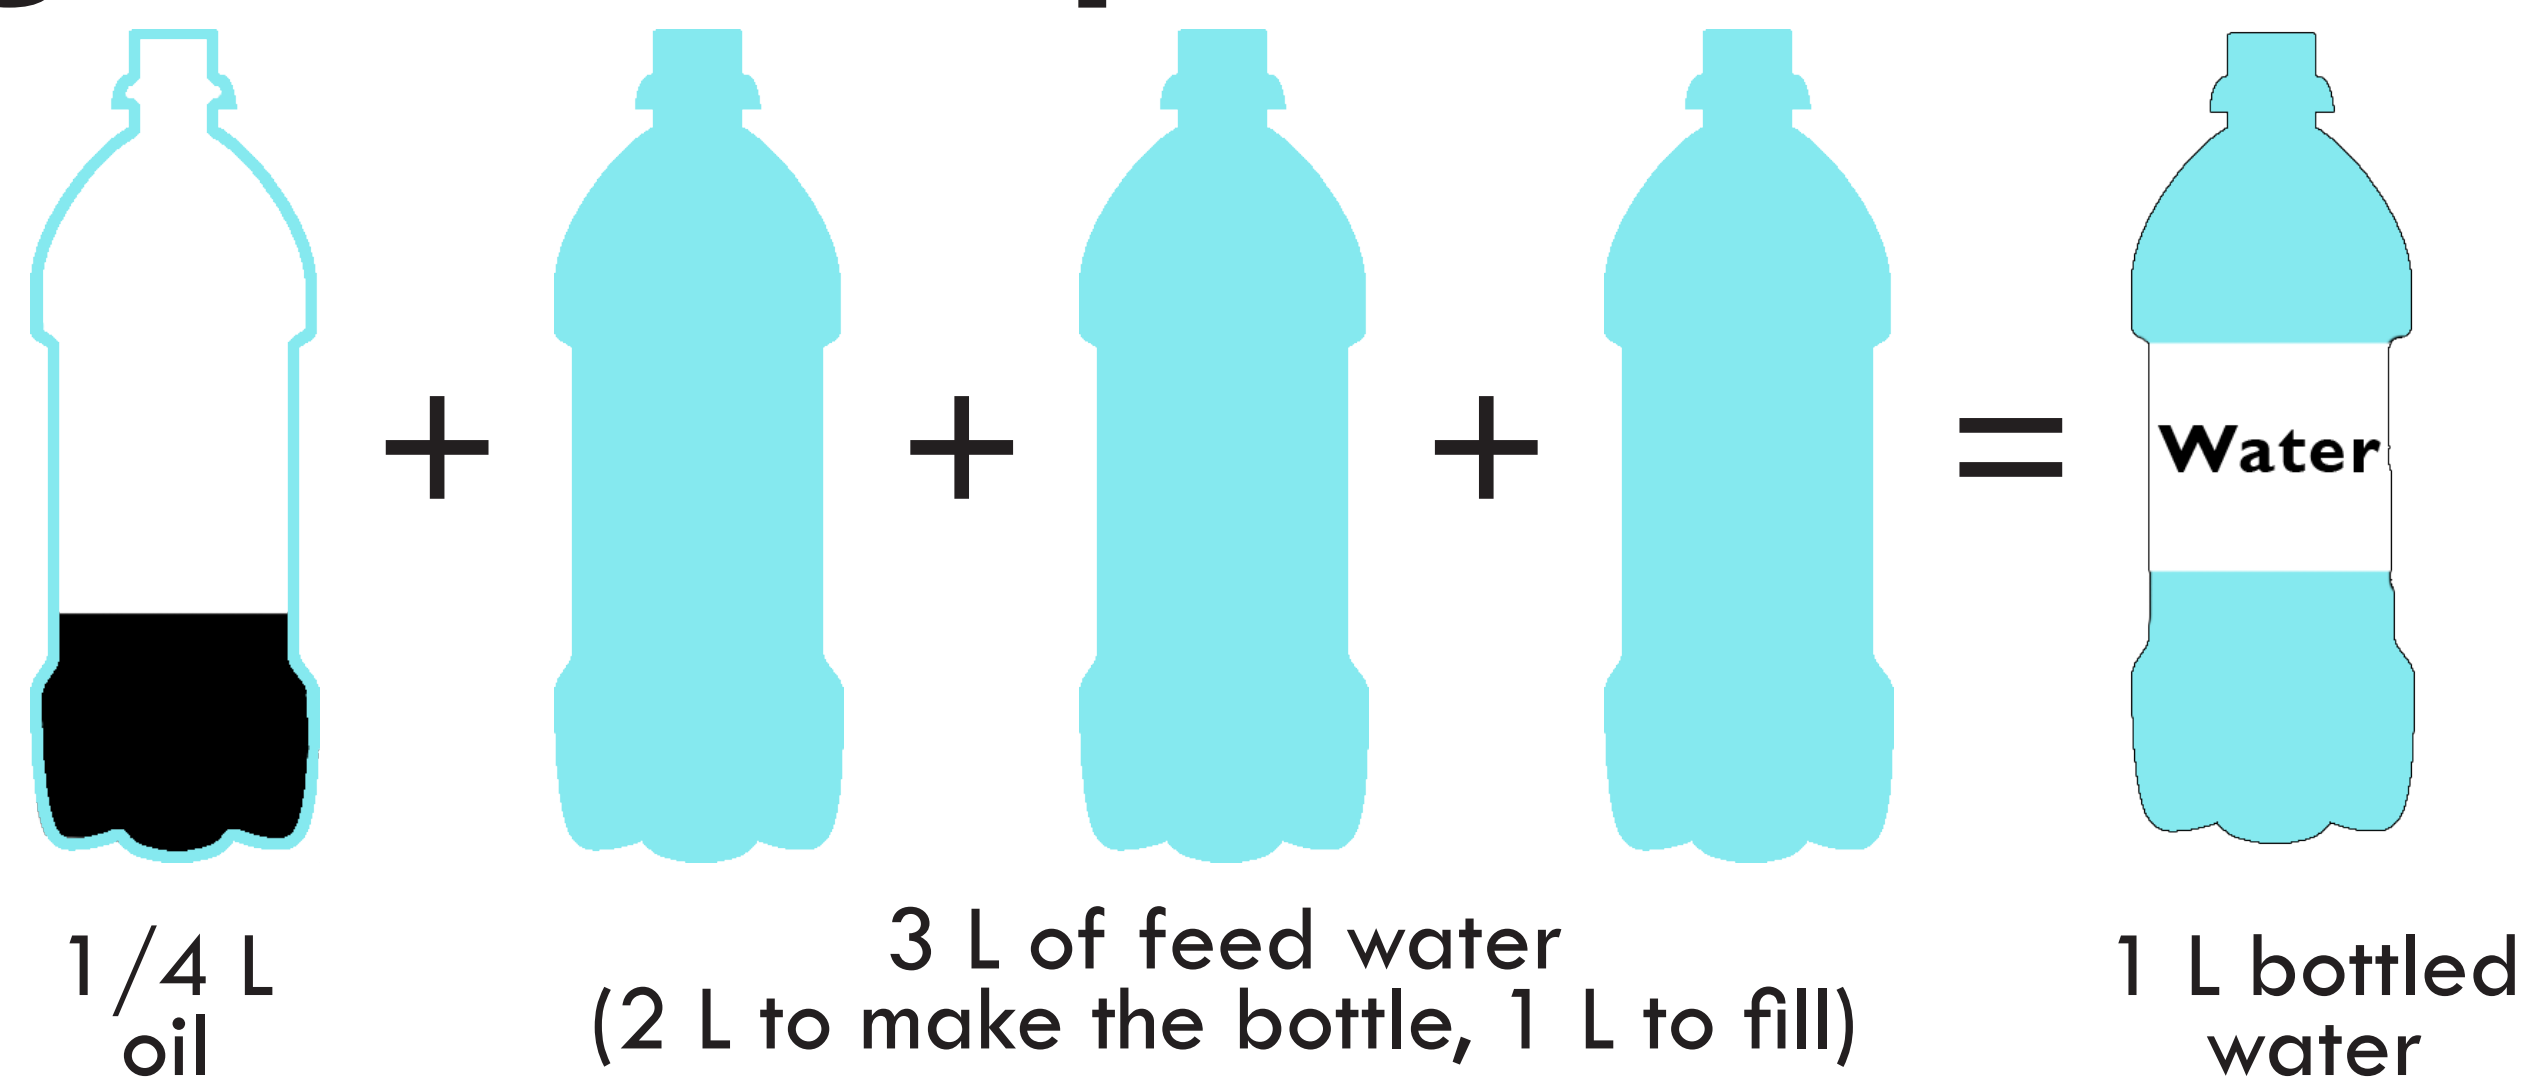

Americans purchase about 50 billion water bottles per year, averaging about 13 bottles per month for every person in the U.S.

By using a reusable water bottle, individuals could save an average of 156 plastic bottles annually.

Every second, 1,500 bottles of water are consumed in America.

Making bottles to meet America's demand for bottled water uses more than 17 million barrels of oil, annually.

How much water really goes into disposable bottles?

By using a REUSABLE WATER BOTTLE, you can conserve water, energy and landfill.

You can also recycle your single use plastic bottle at the Burgess-Shadbush Nature Center in recycling bins located in the multipurpose room, outside by the pavilion and outside by the firepit.
