

# Harry Potter Keychain

## SUPPLIES:

- Key ring
- Beads
- Cord

## DIRECTIONS:

1. Using the circle key ring, fold the in half and slide it through a key ring, creating a loop. Then pull the ends of your cording through the loop.
2. The beads may only allow one piece of cord through. Tie a tight knot with the spare piece of cording around the main piece of cord. Cut the excess.
3. Decide on the pattern of the beads before threading them onto the key chain.
4. Thread the beads until the desired pattern is completed.
5. Knot off the end of the cording tightly, and cut off the excess.
